

Weekend Weather Report

10-10-2024

Thursday

The country is experiencing an extension of a weak Low Pressure System accompanied by a hot and relatively humid to humid air mass with light to moderate southeasterly wind to light variable wind with a chance for fog formation tonight, and early morning hours. In general, the weather will be hot by the day, rather hot to mild at night

Thursday by the day:

- Hot and relatively humid over coastal areas with light to moderate southeasterly wind with speed of (08-26 km/h).
- Maximum temperature: (37-39°C)
- Sea state: light to moderate. Wave height: (1-3 ft.)

By night:

- Rather hot to mild and relatively humid over coastal areas. Light to moderate southeasterly wind to light variable wind with speed of (08-26 km/h) and a chance for light fog formation over some areas.
- Minimum temperature: (21-24°C)
- Sea state: slight to moderate. Wave height: (1-3 ft.)

Friday by the day:

- Hot and relatively humid especially over coastal areas with light variable wind to light to moderate southeasterly wind with speed of (08-30 km/h).
- Maximum temperature: (37-40°C)
- Sea state: light to moderate. Wave height: (2-5 ft.)

By night:

- Rather hot to mild, and humid. Light to moderate southeasterly wind to light variable wind with speed of (08-28 km/h). Chances for fog formation and a drop in visibility over some areas.
- Minimum temperature: (25-28°C)
- Sea state: slight to moderate. Wave height: (1-3 ft.)

Saturday by the day:

- Hot and humid especially over coastal areas with light variable wind to light to moderate southeasterly wind with speed of (08-32 km/h), and some scattered clouds will appear.
- Maximum temperature: (37-39°C)
- Sea state: slight to moderate. Wave height: (1-4 ft.)

By night:

- Rather hot to mild, and humid. Light to moderate southeasterly wind to light variable wind with speed of (08-28 km/h). Chances for fog formation and a drop in visibility over some areas.
- Minimum temperature: (23-25°C)
- Sea state: slight to moderate. Wave height: (1-3 ft.)
