

## Weather Report

Day: Monday

Date: 18/03/2024

The weather maps indicate that the country is experiencing a rainy condition, thundery at times starting from Monday's afternoon on western areas. Chances for rain will continue and reach its peak on Tuesday's afternoon with an increase in low, middle, and cumulus clouds accompanied by light to moderate, heavy over some areas rainfall with a chance for hail fall at times. Fresh wind is expected that will exceed 60 km/h causing low visibility over some areas, and rough sea waves exceeding 6 feet.

Weather conditions will gradually improve after Tuesday's midnight in which clouds and rainfall will decrease with a chance for fog formation over some areas on Wednesday's morning. Chances for light to moderate rainfall expected to come back on Friday's morning.
